

NEXT CONNECT™ SYSTEM

EASY SINGLE-CIRCUIT CONNECTIVITY

Connect up to
eight duplex power modules to
one standard 15-amp power cord with
NEXT CONNECT.

- Connect interchangeable power modules in any order
- Perfect for applications where set up or configuration may change
- Reduce the number of power sources needed - up to eight connections are handled per source
- Recognized by UL 962

Next Connect components:

- Power infeed with control box
- Duplex power module with bracket (bracket not shown)
- Jumper cord

Specify the Next Connect system when:

- Less than 15 amps of power will be drawn from all electrical devices in a given string (12 amps under continuous use)
- Tables include a beam for placement of brackets
- Worksurface provides access to the beam through grommets (optional for DataLink tables)

Safety is assured with built-in diagnostics from LED indicator on infeed.
Available for use with InTandem and DataLink table systems.
